

HEXBUG® Inchworm Micro Robotic Creatures

The **HEXBUG Inchworm** is a micro sized robotic creature that is a tiny electro mechanical wonder. The user controls precisely where it scurries with a miniature infrared remote control unit. Each HEXBUG Inchworm and controller is outfitted with two channels so that two bugs can be operated independently or at the same time. The HEXBUG Inchworm's crawling motion is simply fascinating to operate and watch.

How does it work?

The **HEXBUG Inchworm** offers seven-way steering and can pirouette in place when stopped on its center pod foot. Two button cell batteries are included in each Inchworm and each remote.

Fits in the palm of your hand for miniature fun at anytime!
